Notes (delete these from the final list)
- The nature of the data collection and the chosen anonymisation strategy will affect which fields are to be included in the data list.
- Fields and columns should be filled in in a consistent format throughtout the data list.
- Bold fields should be seen as a minimum for effective reusability of the data.
- Italic fields should be used as appropriate, and ideally in the order they appear here.
- Fields that are relevant for your specific data collection should be added to the table.
- When the table is completed, remove italics, make all headers bold, align fields, and delete any blank columns.
